PROFESSIONAL SUMMARY

Enthusiastic and motivated Computer Science student with a strong foundation in Java programming, object-oriented design, and web technologies (HTML, CSS). Passionate about building scalable applications and learning new technologies. Familiar with fundamentals of Cyber Security and committed to writing secure, clean code. A quick learner with a problem-solving mindset, eager to contribute to real-world software development teams.

EDUCATION

Bachelor of Computer Science Specializing in Cyber Security **2022–2026**

Avanthi Research And Technological Academy, (Vizianagaram) | CGPA: 8.43 |

Andhra Pradesh Board of Intermediate Education **2020–2022**

12th Class (XII), NRI Junior College, (Boyapalem) | Percentage: 94.5% |

Andhra Pradesh Board of Secondary Education **2019–2020**

10th Class (X), ZP High School, (Burugupalem) | Marks: 590/600 |

INTERNSHIPS

AI & ML Intern – Blackbucks Education Pvt. Ltd. | **16 Weeks** | **Dec 2025 – Mar 2025**

- Completed a 16-week internship in Artificial Intelligence and Machine Learning.
- Gained practical exposure to AI and ML concepts through internship learning activities.

JAVA FULL STACK INTERN — Tanasvi Technologies Pvt. Ltd. (Virtual) **May 2025 – July 2025**

Organized in collaboration with APSCHE (Andhra Pradesh State Council of Higher Education).

- Completed structured training in Java Full Stack Web Development.
- Practiced front-end technologies: HTML, CSS, and JavaScript; and back-end technologies: Java, JDBC, Servlets, and JSP.

TECHNICAL PROJECTS

1. A Secure Framework for Preserving and Verifying the Integrity of Digital Forensic Evidence

- Developed a secure framework to preserve and verify the integrity of digital forensic evidence.
- Implemented SHA-256 hashing to generate unique hash values and detect unauthorized modifications to digital evidence.
- Integrated AES encryption for secure evidence protection and blockchain technology for maintaining tamper-resistant records.
- Implemented timestamping and audit trail logging to ensure evidence traceability and verification.
- Developed a web-based application using Django/Flask, MySQL, HTML, and CSS.

Technologies Used: Python, Django/Flask, MySQL, SHA-256, AES Encryption, Blockchain, HTML, CSS.

2. Real-Time Object Detection System using OpenCV and YOLO

- Developed a real-time object detection system using OpenCV and deep learning models.
- Captured live video feed from a webcam to identify and label objects on-screen with bounding boxes.
- Used YOLO for object detection and OpenCV for image processing and real-time video handling.

Technologies Used: Python, OpenCV, TensorFlow, NumPy, YOLO.

TECHNICAL SKILLS

Programming: Java, Python (Basic), C
Web Technologies: HTML, CSS
Data & Database: SQL (Foundational), MySQL, DBMS
Cybersecurity: Fundamentals, Nmap (Basic)
Tools & Office: Git, Microsoft Excel, Word, PowerPoint
Core Strengths: Analytical Thinking, Problem-Solving, Attention to Detail, Communication, Adaptability

CERTIFICATIONS AND EXTRA CURRICULAR

Certifications: NPTEL–Privacy & Security (Elite Silver, 75%), TANASVI–Java Full Stack, Infosys–Data Structures and Algorithms Using Java, Programming and Object-Oriented Programming Using Java, Generative AI – Foundation Program, DBMS HSQL.
Courses: W3Cx–HTML5 & CSS3 (edX), Infosys–HTML, CSS3
Workshops: DevOps, Cybersecurity & Ethical Hacking, Mobile App Development (Data Pro)
Platforms: edX, Infosys Wingspan, NPTEL, Data Pro
